

CS-175 Web Design Tutorial Assignment

Introduction

At the end of the tutorial in your textbook, you will find four (4) case problems presented. For each case problem, the textbook tells you the names of the data files you will need in order to complete that case problem (These data files are provided by the instructor on ANGEL. Follow the link labeled “Data Files” in this folder to get to the zip file containing data files for all case problems.) The textbook then gives a description of what to be created in the case problem. Then it gives step-by-step instructions you will need to follow in order to complete the case problem. In most cases, the textbook even gives you an illustration that shows how the final product should look like. Your task is to follow the instructions step-by-step and produce a final product similar to the one provided in the textbook.

Assignment

Your assignment for this tutorial is to select, complete, and submit *only one* (1) case problem by the announced deadline. The case problems vary in length and complexity but are equally important and will be graded equally. Each case problem is worth 5% of your total grade in the course. They must be done and submitted to the instructor using ANGEL. Grades on each case problem will be as follows: 5 (Correct), 4 (Minor Mistakes), 2 (Major Mistakes), 1 (Poor Try), and 0 (Not Submitted).

Instructions

1. Create a new folder and name it after this tutorial number.
2. Click on the link labeled “Data Files” in this folder to get to the zip file containing data files for all case problems for this tutorial.
3. When the timer stops, right click on the name of the zip file and save it to your computer in the folder you created in Step 1.
4. Unzip the file to extract the data files which are organized in separate folders, one per case problem. They are labeled case1, case2, case3, and case4.
5. Follow the instructions given in the textbook to complete the case problem of your choice.

Submission Instructions

1. A drop box (labeled “Drop Box”) is provided in this folder for you to submit your solutions to the case problem you have chosen. Please submit your solution to one case problem in the drop box.
2. When submitting your solution, please make sure that you
 - a. **Attach only the completed file or files** you are asked (by the textbook) to submit or show to the instructor. Do not submit the data files. I have access to those files.
 - b. **Use the following naming scheme** for your file to be submitted. Let’s say that your name is Jane Smith and you are submitting an HTML file for your solution to Case Problem 2 in this tutorial. Then the file you want to submit must be named **Smith-Jane-2.html**.
